

**Backhoe Loader XT876**

Backhoe loader XT876 is a kind of the multi-functional engineering machinery incorporating excavating and loading into an organic whole. The digging device can be pushed in the integral frame if necessary. Adopt the Cummins engine which is powerful and with low maintenance. Reach Euro-3 emission standard. It has the high power and good performance ability ,The key parts such as the case, the bridge,the hydraulic system, etc.Adopt the imported components, which have improved the dependability of the complete machine.

Traveling has been improved by means of the highest speed. It is usually used in the narrow ground because of the small turning radius. 4-wheel drive bring it high drawbar force. Adopt the professional integral frame,which improves the operating stability. With imported hydraulic system, the working ability has been improved. Advanced operating system, high control accuracy.

The whole day-lighting closed driver's cabin is furnished with the system of the air conditioner, ROPS system.It is safe and comfortable, and the visual field is broad. It adopts the sound insulation,the heat insulation and shock attenuation, which improved the comfortableness of the operating environment.

The digging device can be pushed to left or right side if necessary, so it can increase the digging area ,while the complete machine needn't move. Various instruments such as 4 in 1 bucket, crash hammer and twist drill can be chosen.

Overall Dimensions(LxWxH)	5900x2300x3450mm
Machine weight	8400kg
Rated power	82kw
Bucket	1.0m3
Dumping height	2825mm
Dumping reach	745mm
Digger capacity	0.20~0.35m3
Max. digging depth	4100mm
Max. digging radius	5400mm

NOTICE: All dimensions are approximate. Specifications are subject to change without notice.
