

**Sugarcane Harvester 4GZ-9**

**Application scope:** Plain, coteau, soft sugarcane field.

**Function:** Reap, spread sugarcane, and corn, etc.

**Features:**

1. It can reap and pave sugarcanes in various natural state such as downfallen curl, and height thickness, etc, with strong adaptive capacity.
2. Use advanced hydraulic control systems so that the machine can be adjusted according to different field conditions.
3. The machine is in small size, light weight, which is good for the field.
4. Sugarcane pave and put neatly after harvesting, easy to make a process operate it.
5. The knife can cut deep into 20-30mm soil layer, the damaged-head rate is lower than 20% of the national standards.
6. Able to cut and pave 1.5-2 mu (Chinese Acre) of sugarcane per hour, is 7-10 times of paved artificial one, which has improved working efficiency and reduced labour intensity.
7. With S1100 diesel engine, good power, low oil consumption, economic.
8. Adapting advanced equipments, Japanese technology, and got State patent.

**Type:** Step spread on right

**Engine:** S1100 diesel engine 12.1KW

**Structure weight:** 1300KGS

**Dimension:** 3730\*2260\*1970mm

**Productivity:**  $\geq$  5000kg/h

**Oil consumption:**  $\leq$ 0.15Kg/h

**Damaging rate:**  $\leq$ 20%

**Speed:** forward 0.34 ~ 0.70m/s, reverse 0.29 ~ 0.61m/s.

**Transmission:** Gear, chain.

**Working width:** 1000mm~1500mm
