

Off Road Mining Dump Truck WS3502A2

WS3502A2 off-road mining dump truck is suitable for exploiting of open-pit mine.

The chassis of the vehicle is a special one for self-dumping truck, and it has long wheelbase, and relies on rear-wheel driving (6*4), and has excellent performance for rider movement.

It adopts large tonnage and extra wide axle with the large load-bearing capacity and good reliability, also adopts integrated hydraulic press power steering device with the advantage of easy turning.

Besides, its sliding front suspension structure is economical to maintain.

Its rear suspension structure with convert plate and spring balance is mature in technology and has universe performance, and its double-circuit pressure driving brake and deflation parking are steady and safe.
