

## Paddy Thresher 5TG-180

Auto threshing about 2500~4000KGS per hour. Auto input the bundles, and auto load the grain into bag after threshing.

Dual power supply by electrical motor 15KW 380V or diesel engine 24hp. Both dual power are equipped for your flexible choice.

Electrical motor 15KW 380V save more energy, with lower running cost and lower noise.

Diesel engine 24hp is more powerful, more efficient and more convenient for transportation.

The thresher is with easy operation similar as you operate the printer. You just put the bundles on the input board. Then it auto input the bundles in line. Double conveyor clamp the bundles. More stable, and more safe. No damage to the straw in bundles. Bundles in, and bundles out. Auto load the grain into bag after threshing. Open one and prepare another. Save more time. Faster. More convenient.

Dust collector available for better working condition. Special air in draft design for clean threshing. Special "V" design for auto separating: straw, grain ...

After threshing, check the straw. There is no remaining. Very clean! No additional extra work. No wasting. Straw in bundles can be recycled for more benefit.

It is light, mobile and more convenient. It can be directly pulled by tractor. It help farmers go the way to be rich.

**Power:** electrical motor 15KW 380V and diesel engine 24hp.

**Productivity:** about 2500~4000KGS per hour.

**Total losing rate:**  $\leq 2.5\%$

**Impurity rate:**  $\leq 1\%$

**Damage rate:**  $\leq 0.5\%$

**Machine Weight:** 1380KGS

**Dimension:** 4800\*1900\*2060mm

Note: All dimensions are approximate. Specifications are subject to change without notice.
