

产品简介

4K-50稻麦自动割捆机,引进国外技术生产,国内独一机型,设计精巧,结构精密,性能可靠,质量稳定,带有差速转向功能,特别适用于山地、丘陵地区及东北大部分地区的小麦、水稻、蒲草、谷物等低杆作物的收割捆放,突出特点是割的干净,割茬低,自动打捆,自动抛放,适应于成捆存放的农作物,是水稻、小麦等作物收割打捆的理想机具,可以大大降低劳动强度,提高生产效率。

The reaper-binder 4K-50 is mainly for paddy and wheat, grass, lucerne with height above 60cm or higher. The reaper-binder 4K-50 reaps crop clean with low stubble, and binds simultaneously. It is very efficient and reduce the hard work greatly.

It is unique, and with advanced technology, compact structure design, reliable performance, good quality, differential speed turning function. It is specially fit for hilly area.

The powerful gasoline engine is easy to starting, and with low noise, and reliable for easy working.

The steer control handlebar can be freely adjusted to up, down, left, or right. The handlebar can be 360° rotating. There are 5 shift for the reaper-binder 4K-50 to be adjusted to fit for different farmer's height.

It is very economical, efficient, practical, with light weight and flexible easy operation.

机器性能、指标参数

外形尺寸 Dimension	整机质量 Machine Weight	传动方式 Power Transmission	打捆方式 Binding Mode	捆绳种类 Rope type	割台形式 Reap platform	割台割幅 Reap width
2100*800*1000 毫米(mm)	260千克 (kg)	皮带+传动轴 belt + axle	全自动 auto	塑料绳 plastic rope	立式 Vertical	50厘米 (cm)
总损失率 Total loss	成捆率 Binding rate	割茬高度 Reaping Height	生产率 Productivity	配套发动机 汽油发动机 Powergasoline engine	耗油量 Oil Consumption	
≤1%	≥95%	≤100mm	0.1-0.2hm ² /h	罗宾7.5hp 或 三菱6hp ROBIN 7.5hp or MITSUBISHI 6hp	≤8KGS/hm ²
