

DEVELON

DL300

Bucket:1.8m³ | Rated power:103kW/2,200rpm | Rated deadweight:3,000kg

DL 300

Performance characteristics

- **Golden Power**

The diesel engine can meet the emission requirements without adding urea; Power optimization and matching, high fuel efficiency, low speed torque, strong power, high working efficiency.

- **Efficient and reliable**

Frame lightweight design, hinged alignment arrangement, steering Angle, small turning radius, flexible operation. Optimize structural design and eliminate local weaknesses. Accelerated reliability test verification of heavy load to meet the needs of various harsh working conditions; Fixed shaft transmission, industry classic transmission, direct and efficient transmission, stable quality, high reliability.

- **Safe and comfortable**

The whole cab is fully sealed design, transmission system optimization, shock absorption and noise reduction, safe and comfortable driving; Luxury seats, increase the interior, air conditioning in the lower part of the seat, wind comfort. Equipped with internal ceiling light, fan, water cup holder, so that users convenient and intimate use.

- **Easy maintenance**

Integral back tilting hood, opening Angle 60°, engine fully exposed, easy maintenance; Large screen intelligent combination instrument, intuitive numerical display, complete functions, real-time understanding of the state of the machine; The butter mouth is drawn by ergonomic design, saving time, labor and convenient maintenance.

Product parameter

Rated deadweight

3,000kg

Lengthening arm unloading height

3,240mm

Rated power

103kW/2,200rpm

Wheel track

1,850mm

Wheelbase

2,650mm

Maximum unloading Angle

45°

Rated bucket capacity

1.8m³

Maximum turning Angle

55.5°
