

# DEVELON

# DL667

Bucket:3.5m<sup>3</sup> | Rated power:178kW/2,000rpm | Rated deadweight:6,400kg

# DL 667

## Performance characteristics

- **High reliability**

Equipped with a new generation of Weichai IV engine, surging power, efficient and reliable; Equipped with ZF electronically controlled transmission and imported hydraulic parts, the power of the entire transmission system reaches an excellent state, which ensures high reliability while saving energy and efficiency.

- **Strong comfort**

Special steering flow amplification system and flexible limit system, with electronic control transmission, greatly reduce the control impact; Industry special silicone oil shock absorber, greatly reduce the cab vibration, imported engine, gearbox shock absorber, further reduce the vibration of the whole machine, to ensure high comfort.

- **Worry free after sale**

Gearbox commitment 2 years /6000 hours not open box maintenance, failure to replace new gearbox; The whole machine and structural parts enjoy a long warranty period.

- **Easy to maintain**

Spacious engine hood side window to ensure that all engine maintenance points are within reach; The butter filling port and transmission oil filling port are all drawn out for easy filling.

## Product parameter

|                       |                   |                                  |               |
|-----------------------|-------------------|----------------------------------|---------------|
| Rated deadweight      | 6,400kg           | Lengthening arm unloading height | 3,265/3,690mm |
| Rated power           | 178kW/2,000rpm    | Wheel track                      | 2,250mm       |
| Wheelbase             | 3,400mm           | Maximum unloading Angle          | 48°           |
| Rated bucket capacity | 3.5m <sup>3</sup> | Maximum turning Angle            | 45°           |
