

Sugarcane harvester reduce much labor cost, and harvest faster and more efficiently.

This kind of sugarcane harvester cuts the cane at the base of the stalk, and then just strips the leaves off. These whole stalks are then deposited into the collector behind the sugarcane harvester.

Harvested cane by sugarcane harvester whole stalk type can be stored for longer time.

wheel type whole stalk sugarcane harvester 4GZ-1

Harvesting mode: Whole stalk

Harvesting row: 1 row

Applicable row space: 0.8~1.8m

Engine: Cummins engine 130hp.  
REXROTH 45 load sensitive piston pump,  
REXROTH 45 oblique motor,  
EATON cycloidal motor,  
hydraulic drive, variable speed  
with smart collector for self-unloading 600KGS.

Traveling speed: stepless speed change 0~20km/h

Fuel consumption: 23KGS/h

Tire centre distance: 1450mm

Machine weight: 6 ton

Dimension: 7000\*2200\*3000mm

Every 1 unit can be in one 40' high container for economical shipment.
