

MINING DRILLS

DOWN-THE-HOLE DRILL RIGS

ZDH SERIES

- High-pressure atmospheric volume double-stage screw head is adopted, which is matched with high-frequency fast impactor, with fast drilling speed and high hole quality.
- The crawler chassis has strong walking ability and good off-road performance.
- It is suitable for various complex landforms and harsh environments, and can adjust the slewing speed according to different rock strata to meet the requirements of soft rock and hard rock operations.
- The drilling angle range is large, which meets the operation of vertical holes and angle holes.
- The machine is not disassembled for transportation, and the operation is simple; the maintenance points are arranged centrally, and the maintenance is convenient.
- Standard air conditioning, large-area glass windows, and wide vision.

ZDH115A

- Ø 90-140mm
- 224kW/1800rpm
- 28m

ZDH152A

- Ø 115-165mm
- 277kW/2100rpm
- 45m

LARGE EXCAVATOR

FUEL-POWERED EXCAVATOR

G-Series Excavator

- Customized engine produces large torque, strong power, stable flow output and higher efficiency. Advanced control system enables optimal control of torque and flow, achieving higher fuel efficiency.
- Equipped with upgraded MyZOOMLION APP, the operator can monitor the status of the excavator in real time. Applying special-purpose hydraulic oil doubles the maintenance interval. One-stop maintenance guarantees shortened maintenance time.
- Applying large-profile and high-strength steel to improve durability; The fuel tank with large capability meets the need of three shifts; Integral large-profiled structure and strengthened key structure enable the excavator to adapt to various harsh working conditions.

ZE550G

- 53500 kg
- 277 kW / 2100 rpm
- 2.85-3.6 m³

ZE750G

- 76500 kg
- 563 kW / 2100 rpm
- 4.6-5.1 m³

ZE900G

- 92000 kg
- 563 kW / 2100 rpm
- 5.5-6.5 m³

ZE1250G

- 116000 kg
- 567 kW / 1800 rpm
- 7.1-8 m³

ZE1350G

- 135000 kg
- 567 kW / 1800 rpm
- 8-10 m³
